Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Pursuant to preliminary amendment, claims 1-10 and 15-16 have been cancelled, claim 21 has been amended, and claims 11-14, 17-19 amended. Claims 11-14, 17-21 are pending. Claims 11-14 and 21 are characterized as allowable.

✱

The following is a quotation of the first paragraph of 35 U.S.C. §112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it in such full, clear, concise and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 17-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The cited claims are drawn to a "pharmaceutical" composition. The term "pharmaceutical" implies an assertion of therapeutic efficacy, which is not in evidence. It is true that the claimed compounds are essentially conjugates between a "first" compound and a "second" compound, wherein the "first" compound is one which has been shown by others to be therapeutically effective in the treatment of one disease or another. But it has not been determined whether the "first" compound will be "liberated" (in vivo) when administered to an animal. If the pharmacologically active compound is not released intact, the asserted prodrugs will not be therapeutically effective. And if the

pharmacologically active compound is released, but very slowly, it may not be effective because of inadequate concentration *in vivo*, or may under go further transformation *in vivo* by xenobiotic metabolic enzymes. As stated in *Ex parte Forman* (230 USPQ 546, 1986) and *In re Wands* (8 USPQ2d 1400, Fed. Cir., 1988) the factors to consider in evaluating the need (or absence of need) for "undue experimentation" are the following: quantity of experimentation necessary, amount of direction or guidance presented, presence or absence of working examples, nature of the invention, state of the prior art, relative skill of those in that art, predictability or unpredictability of the art, and breadth of the claims.

Accordingly, "undue experimentation" would be required to use the claimed compositions to treat human disease. It is suggested that the term "pharmaceutical" be deleted from the claims.
